

DAKOTA STREET - CANTON

Project Improvements

The City of Canton Intends to reconstruct Dakota Street, an aging deteriorating transportation corridor within the community. In the coming years, approximately one mile of Dakota Street is planned to be rebuilt beginning at US Highway 18 (5th Street) and ending at 281st Street. Some of the project improvements include:

- New concrete street surfacing and curb/gutter
- New sanitary sewer main expanding the sewerability of property along Dakota Street
- New water main replacing older, undersized mains resulting in increased water flows for drinking water and fire protection
- New storm sewer system reducing the amount of water on the street
- Bicycle lanes to enhance connectivity between residential - school - business - recreational - regional properties

MULTIPLE USES FOR THE IMPROVED DAKOTA STREET
